FIGURE 7.

This figure graphically compares the 24 hour total rainfall forecasts from the models [AVN and Meso-Eta], the Hydrologic Prediction Center [HPC], and the WFO Los Angeles/Oxnard forecasts [LOX] with the observed rainfall at each of the eight prediction points used in the WES exercise [SMX ~ Santa Maria; SBA ~ Santa Barbara; SMP ~ San Marcos Pass; LOX ~ WFO Los Angeles/Oxnard; VTX ~ Sulphur Mountain; CQT ~ Downtown Los Angeles; NWL ~ Newhall; CIO ~ Chilao].
